**DETAILED ACTION**

***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1 - 7 drawn to an organic polymer having an organosiloxane end structure comprising aliphatic groups and an epoxy containing monovalent organic group.

Group II, claim(s) 8 and 9 drawn to processes of producing the organic polymer according to claim 1.

The inventions listed as groups I - II do not relate to to a single inventive concept under PCT rule 13.1 because under PCT rule 13.2, they lack the same or corresponding special technical features for the following reasons: The common technical feature in all groups is the epoxy/organosiloxane organic polymer in Group I. This element cannot be a special technical feature under PCT rule 13.2 because the element is shown in the prior art. Pines et.al. (US patent 4,184,004) discloses an organic polymer having an organosiloxane end structure containing an aliphatic group and an epoxy group (col. 2, lines 10-65 and col. 3, lines 5-50).
